

## Stoneware/Dell Webinar Schedule for January - March

Please select one of the webinars below that fits your vertical and your availability, click on the link, and register. We will provide a brief overview of this exciting solution, show a live demonstration of the technology, and answer any questions you might have regarding how it will benefit your organization.

### K12 Webinar

## Stoneware and Dell help K12 customers build private clouds and deliver virtual web desktops to access them.

Private cloud computing is no longer a buzz word or a theory. K12 schools around the country are building private clouds, having realized they must do something different in order to meet the challenge of smaller budgets and increased demands for web access to critical resources. Stoneware and Dell will provide you a step by step, affordable process for building your secure, private cloud to deliver access to applications, files, and data from any device, anytime, anywhere. Safely allow students and faculty to use their own computers from home or bring them into the school. Learn how to deliver a virtual web desktop to the latest Netbooks and smart phones. See how you can create "cloud terminals" out of old or refurbished equipment.

Private cloud computing is real and it is now. Join us for this webinar to see how you can quickly take advantage of this revolution.
