Stoneware Inc. to Integrate webInflection's webRDP Client

Indianapolis, IN – June 16, 2010 – Stoneware, Inc. announces today that they will include the webInflection webRDP client in their upcoming release of webNetwork 6.0. The webRDP client is a web-based, remote desktop client for connecting to Windows® Terminal Servers, Windows® Remote Desktops, and Virtual Desktop Infrastructures.

The webRDP client can be invoked through many different web applications and run on a wide range of client platforms including Windows, Mac, Linux. The webRDP client will provide a scalable and stable interface to remote Windows devices through all popular web browsers.

“As a private cloud company, we want to provide our customers and their users with the very best experience when access Windows desktops via the cloud” states Rick German, CEO. “Finding a common, cross-platform solution has been a challenge. We are excited to be partnering with webInflection.
