

## STONEWARE, INC. CEO to Present at Cloud Computing Expo in New York City

INDANAPOLIS, IN.—Stoneware, Inc., a leader in private cloud software, today announced that founder and CEO, Rick German will present at the Cloud Computing Expo in New York City on April 19, 2010. Stoneware will demonstrate how their flag-ship product, webNetwork, creates a private cloud platform for delivering IT services as well as the virtual web desktop to access it.

Private cloud computing is no longer a buzz word or a theory. Organizations around the country are building private clouds, realizing they must do something different in order to meet the challenge of smaller budgets and increased demands for web access to critical resources. Stoneware provides its customers an affordable means to build a secure, private cloud to deliver access to applications, files, and data from any device, anytime, anywhere.

### **Stoneware Solution**

Stoneware's private cloud software solution has been deployed at over 250 customers representing over 3 million seats in various sectors, including education, manufacturing, healthcare, legal, and finance/banking. Stoneware's webNetwork creates a private cloud that allows organizations to seamlessly utilize their existing IT infrastructure and also enables them to benefit from the growing shift to SaaS and hosted applications in the public cloud space. webNetwork incorporates on-premise custom, legacy and 3rd party applications. The technology seamlessly integrates web-based and cloud applications into one secure, virtualized web desktop that is accessible via any browser.

Key aspects of the webNetwork solution include:

- Creates a private cloud platform and the virtual web desktop to access it
- Installed inside the customer's data center, on their servers, and managed by their IT staff
- End users can access their web, Windows, and hosted web applications from a virtualized web desktop
- Provides many other critical cloud services including registration, self service, file access, blogs, forums, reporting, and web forms
- All webNetwork services are secured through webNetwork's unique two-tier server/relay architecture creating a private cloud platform that is both rich in services and security.

**Cloud Computing Expo**

The 5<sup>th</sup> International Cloud Expo will take place April 19-21, 2010, at the Jacob Javits Convention Center in New York City. The three-day event will offer a rich array of sessions led by exceptional speakers about the business and technical value of cloud computing with more than 80 sponsors and exhibitors on the 70,000 sq. ft. show floor and over 5,000 estimated delegates from well over 48 different countries.

**About Stoneware**

Headquartered in Indianapolis, Stoneware is a privately held corporation providing innovative software that enables organizations to deploy their own private cloud and the virtual web desktop to access it.
