STONEWARE, INC. Announces Folder Monitor for webOS - Web Desktop Virtualization™

Indianapolis, IN – March 14, 2008 – Stoneware, Inc. today announced the release of Folder Monitor for webOS, Stoneware’s Web Desktop Virtualization™ solution. Folder Monitor provides a rapidly growing remote and mobile workforce with automated web file transfer capabilities from their Virtual Web Desktop™ to their enterprise file storage solution. With Folder Monitor, users are always linked with their corporate home directory regardless of location, desktop, or operating system. Critical documents and files that are updated on the client are seamlessly moved to the network file system, maintaining security and access control.

“Stoneware’s Folder Monitor ensures that no file is left behind.” states Carl Seaver, Vice President of System Engineering for Stoneware, Inc. “Regardless of desktop platform--Windows, Linux, or Mac OS X--corporate users are free to work anytime from anywhere without worry of losing critical corporate documents.”

Stoneware, Inc. will be demonstrating webOS and File Monitor on Novell’s SuSE Enterprise Linux platform at Novell’s international technical conference, Brainshare, the week of March 17th in Salt Lake City, Utah.

Stoneware webOS is the next evolution in virtual web desktop computing. To learn more about Stoneware’s webOS and its integrated features, please visit www.stonewarewebos.com or contact us at 888.473.9485.

About Stoneware
