

Stoneware™ Inc.

StockQuote Component

Stoneware, Inc.

Configuration Sheet

Date: March 2005

Introduction

This document will provide you with the necessary information to install and configure the StockQuote component in your webNetwork system. Users can add their own stock symbols and have the information display in a webNetwork desktop component.

Objectives

- StockQuote Component will let the user enter in a custom list of stock symbols through a webDesktop component.
- webNetwork users will be capable of adding and deleting stock symbols through the StockQuote component.

Requirements

- webNetwork 4.0e (hotfix 2e) or above

Steps

- a) *Extract the contents of the StockQuote.zip file into /stoneware/webserv/apps*
 - i) *Note – if Relay Central is enabled remember to unzip the contents into the RelayCentral /webserv/apps directory*
 - ii) *Note – the zip file will create a new StockQuote sub directory under apps. If you already have a StockQuote directory, extract into a different folder or backup your old version.*

- b) *Create a new webDesktop component*
 - i) *Open webAdmin as a webNetwork administrator*
 - ii) *Browse and expand your Stoneware container*
 - iii) *Select the CREATE A NEW OBJECT option from the left-hand dropdown box.*
 - iv) *Select the **webDesktop Component***
 - v) *Select the NEXT button*
 - vi) *Enter the object name of the component (**StockQuoteComponent**)*
 - vii) *Select the NEXT button*

- viii) Select the WIZARD button
- ix) Select the LINK TO A WEB PAGE radio button
- x) Select the NEXT button
- xi) Enter the Component information
 - (1) **Title** – Stock Quote
 - (2) **Description** – Displays Stock Quotes
 - (3) **Category** – Financial
 - (4) **Size** – Medium or Large
 - (5) **Height** – 300
- xii) Select the NEXT button
- xiii) Enter the URL for the publishing component
 - (1) /apps/StockQuote/stockQuote.jsp (case sensitive)
- xiv) Select the "Window" and "scrollbars" radio buttons
- xv) Select the NEXT button to continue
- xvi) Select the ADD button to assign users to the new news component
 - (1) Select the ADD button
 - (2) Browse and select the user, group, or container that should be assigned to the component.
 - (3) Select the OK button
 - (4) Select the DONE button when you are finished adding users
- xvii) **NEW COMPONENT SHOULD BE CREATED**
- c) Test the new component
 - i) Login to the webNetwork system as a user that has been granted access to the new component.
 - ii) Select the PERSONALIZE button under the ACCOUNT MGMT menu
 - iii) Select the ADD CONTENT button in the right column
 - iv) Check the box next to Stock Quotes
 - v) Press the SAVE SELECTED CONTENT button
 - vi) Select the UPDATE PAGE LAYOUT button
 - vii) Verify the new component is displayed on the user's personalized webDesktop.
 - viii) Click on Add Symbol
 - ix) Enter a name (GOOG)
 - x) Click Save and verify the screen updates with your new symbol.
