

Stoneware™ Inc.

Publishing Component

Stoneware, Inc.

Configuration Sheet

Date: December 2004

Introduction

This document will provide you with the necessary information to install and configure the document publishing component in your webNetwork system.

Objectives

- Document Publishing Component will display all of a user's available documents and libraries through a webDesktop component.
- webNetwork users will be capable of viewing and downloading documents through the publishing component.

Requirements

- webNetwork 4.0 (hotfix 5) or above
- webNetwork Document Publishing
- webNetwork user with access to documents in the publishing system.

Steps

- a) *Extract the contents of the pubComponent.zip file into /stoneware/webserv/apps*
 - i) *Note – if Relay Central is enabled remember to unzip the contents into the RelayCentral /webserv/apps directory*
 - ii) *Note – the zip file will create a new pubComponent sub directory under apps*
 - iii) *Note – you can request the pubComponent.zip from Stoneware Support.*
- b) *Create a new webDesktop component*
 - i) *Open webAdmin as a webNetwork administrator*
 - ii) *Browse and expand your Stoneware container*

- iii) Select the *CREATE A NEW OBJECT* option from the left-hand dropdown box.
 - iv) Select the **webDesktop Component**
 - v) Select the *NEXT* button
 - vi) Enter the object name of the component (**publishingComponent**)
 - vii) Select the *NEXT* button
 - viii) Select the *WIZARD* button
 - ix) Select the *LINK TO A WEB PAGE* radio button
 - x) Select the *NEXT* button
 - xi) Enter the Component information
 - (1) **Title** – Published Documents
 - (2) **Description** – Displays Published Documents
 - (3) **Category** - Publishing
 - (4) **Size** – LARGE
 - (5) **Height** – 300
 - xii) Select the *NEXT* button
 - xiii) Enter the URL for the publishing component
 - (1) /apps/pubComponent/pubComponent.jsp
 - xiv) Select the "Window" radio button
 - xv) Select the *NEXT* button to continue
 - xvi) Select the *ADD* button to assign users to the new publishing component
 - (1) Select the *ADD* button
 - (2) Browse and select the user, group, or container that should be assigned to the component.
 - (3) Select the *OK* button
 - (4) Select the *DONE* button when you are finished adding users
 - xvii) *NEW COMPONENT SHOULD BE CREATED*
- c) Test the new component
- i) Make sure that your user has documents in the publishing system
 - ii) Login to the webNetwork system as a user that has been granted access to the new component.
 - iii) Select the *PERSONALIZE* button under the *ACCOUNT MGMT* menu
 - iv) Select the *ADD CONTENT* button in the right column
 - v) Check the box next to the *PUBLISH DOCUMENTS* component

vi) Press the SAVE SELECTED CONTENT button

vii) Select the UPDATE PAGE LAYOUT button

viii) Verify the new publishing component is displayed on the user's personalized webDesktop.
